R and RStudio: Setup and Installation

Presented by Dr. Bianca Peterson

Lesson Material

Data Carpentry: Ecology Curriculum

<https://datacarpentry.org/R-ecology-lesson/index.html>

Installing R and RStudio

Detailed steps here:

<https://datacarpentry.org/R-ecology-lesson/index.html>

Make sure that you install R first, and then RStudio.

Don't worry about installing packages – this will be covered in the lectures to follow.

Data

We will download the data directly from R during the lesson. However, if you are expecting problems with the network, it may be better to download the data beforehand and store it on your machine.

The data files for the lesson can be downloaded manually here: <https://ndownloader.figshare.com/files/2292169>
